

# AI Internship Proposal @ Euroconsumers

June 2025

## What is Euroconsumers?

As a leader in the consumer organization, Euroconsumers has been dedicated to promoting consumers' rights for over 60 years. They provide various services to their members, including researching, testing, and evaluating products and services to help consumers make informed decisions. Their goal is to empower consumers to protect themselves from unfair practices and promote transparency in the marketplace. Euroconsumers also advocates for consumer rights at a national and European level through lobbying and policy work. With their headquarters in Brussels, they represent over 1 million consumers in 4 countries across Europe. Their network of independent organizations has made them a leading voice for consumers in Europe. In conclusion, Euroconsumers is an organization committed to protecting consumers' rights and promoting transparency in the marketplace.

## What will you be working on?

As part of the Business Analytics team, you will work with international collaborators on innovative projects involving machine learning, natural language processing, large language models and data analytics, all aimed at empowering consumers and improving internal efficiency in different domains, ranging from legal support to automated data processing and reporting for editorial content.

Your mission as an intern is to work in close collaboration with business stakeholders to support the development of tools that can improve the efficiency of internal processes and assess the impact of these tools on the performance of the processes (e.g. time and costs savings).

## What do we offer to you?

- Hands-on experience in a dynamic and challenging international environment.
- Exposure to an internal R&D projects with a focus on a practical application.
- Mentorship and guidance from experienced professionals.
- Warm and open company culture.
- Hybrid working environment with 2-3 days per week at our office in Brussels (near Midi Station).

## What do we expect from you?

### Must have:

- Proactive mindset, strong work ethic, and keen attention to detail.
- Proficiency in English, both written and verbal, for effective communication and documentation.
- Solid programming skills, particularly in Python, with the ability to write clean, efficient, and well-documented code.
- Interest or experience in working with modern AI tools, including Large Language Models (LLMs), either through APIs, chat interfaces, or local deployments.
- A willingness to learn and adapt to new technologies, frameworks, and methodologies in the evolving field of data science.

### Nice to have:

- Experience with data extraction and manipulation using SQL, including writing queries to retrieve and preprocess data from relational databases.
- Exposure to machine learning workflows, including data preprocessing, model training, evaluation, and deployment.

## How to apply?

To apply for the Internship position, please email [jacopo.destefani@test-achats.be](mailto:jacopo.destefani@test-achats.be) and include your CV and any information you think will help us know more about you, your past experiences/side-projects, your interests and qualifications.

Be sure to mention “Euroconsumers – AI Internship” in the subject line of your email.
